

ENVIRONMENTAL POLICY

Structel Limited has recognised the importance of our role in protecting the environment. We are committed to minimising the impact of our operations on the environment and will continue to improve our environmental performance. We will continually review the impacts of our actions and how they effect the environment both directly in terms of our operations, and indirectly through our purchasing decisions, the products and services we offer to our customers and the opportunities we pursue.

Structel Limited is committed to:

- Complying with all Regulations, Environmental Legislation and Codes of Practice
- Protect our natural environment, including preventing pollution, through responsible management of our operations
- Minimise the environmental impacts of our own operations through best practise management of our use of energy, transportation, material consumption, water use and emissions
- Design products to reduce their adverse environmental impact in production, use and disposal
- Providing regular training to all staff and raise awareness on environmental matters
- Communicating our environmental aims to our suppliers and contractors
- Continually review and monitor our Environment Management System so we can continue to improve our environmental practises
